DUAL USE, DUAL SAVINGS

Corrugated tanks offer additional savings when built for dual use water storage. Offset your capital expense with fire protection and domestic water supply in the same tank. A stand pipe or external fitting diverts this additional supply to ensure it does not interfere with the mandated usable volume for fire protection.

WATER RETAINED FOR

DOMESTIC CAPACITY

CAN BE UTILIZED IN SEVERAL WAYS, INCLUDING:

LAUNDRY OPERATIONS

CUSTODIAL SERVICES

IRRIGATION

TOILET FACILITIES

VEHICLE WASHING

LIVESTOCK WATER SUPPLY

- Tanks meet NFPA-22 standard
- All accessories, connections, pipes, and hydrant outlets must meet fire marshal approval
- Review your area's installation requirements, as each tank will be different based on location
